	Examiner Hoang V. Nguyen	Art Unit 2821	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

1. Claims 11 and 12 are objected to because of the following informalities: Claim 11 depends on a subsequent claim 12. Claim 12 cannot depend on itself. Should claims 11 and 12 depend on claim 1 instead? Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 2 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation “lamda” in line 2. Examiner cannot determine what “lamda” is. Does applicant refer to “lamda” as wavelength? If so, “lamda” should be specified in the claim accordingly. Claim 9 is rejected for the same reason. Correction required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by Moore (US 4,825,223).

Art Unit: 2821

Moore (Figures 1-2) teaches a reflective assembly comprising a first reflective surface 10; a plurality of reflective surfaces 12, 14, 16 positioned successively adjacent the first reflective surface, wherein each reflective surface is configured to reflect incident radiation in-phase such that microwave signals reflected by each reflective surface arrive at a common focal point in-phase (abstract).

Allowable Subject Matter

6. Claims 1, 3-8, 10 and 13-18 are allowed.

7. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, Moore discloses a reflective assembly comprising a first reflective surface; a plurality of reflective surfaces positioned successively adjacent the first reflective surface, each reflective surface having a focal point and focal length relative to the first reflective surface. Moore, however, fails to specifically teach that wherein one or more of the reflective surfaces are translated about one or more common axes, resulting in an offset of the focal point of one or more of the reflective surfaces relative to that of the first reflective surface.

Claims 3-8, 10 and 13-18 are allowed for being dependent upon claim 1.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patents 5,606,334 and 6,281,852 teach an antenna assembly comprising a plurality of reflective surfaces disposed adjacent and parallel to each other.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoàng V. Nguyen whose telephone number is (571) 272-1825.
